Natalie Perkins, 11- Deridder

I hunted deer with my dad and step mom. I killed a 8 point buck that was 175 pounds.

We went out to the stand that morning and saw a couple deer but I didn't get a good shot. When we went out that afternoon we were sitting there and a doe came out. The buck came out right after and started chasing the doe. My dad helped me line up the gun while it was resting on my step mom's arm and I pulled the trigger and hit him. He ran into the woods and my dad drug him out for me.

Parent entry: We were so blessed she was able to experience this. Being in a wheelchair you sometimes feel she will be excluded from the things we take the most joy in. Her first time hunting and she got her first kill. We were all over the moon excited for her. She doesn't let her disability stop her!
